

LSS-534

Description:

LSS-534 is a color coded water soluble performance product that has been designed to unload produced fluids from gas wells.

LSS-534 is a synergistic blend of several water soluble components that work together to form a high water content.

LSS-534 has a high tolerance for liquid hydrocarbons and has low emulsions forming tendencies.

Usage:

LSS-534 dissolves rapidly, foams quickly, and is therefore especially effective for unloading weak wells that are loading up to 1/2 to 1 barrel of produced water per day. LSS-534 is also effective on wells that accumulate less than three barrels over a fairly long period of time. Most often 2 to 6 units are all that are needed to unload the well.

Typical Physical Properties:

Form	Solid, Cylindrical
Color	Hot Pink
Density @ 77°F (g/ml)	1.147
Density @ 77°F (lb/gal)	9.55
pH of 1% solution	7.67

Handling and Storage:

LSS-534 is an industrial chemical product. All safety and handling warnings on the product container and the material safety data sheets should be observed. For detailed safety and disposal information please refer to the material safety data sheet. Store in a cool, dry location.
